WASHINGTON, March 10.—The President, after a conference with the Secretary of State today, issued the following executive order respecting the observance of the proclamation recently promulgated declaring the neutrality of the United States between Russia and Japan, combatant nations in the Far Eastern war now in progress:

"All officials of the government, civil, military and naval, hereby are directed not only to observe the President's proclamation of neutrality in the pending war between Russia and Japan, but also to abstain from either action or speech which can legitimately cause irritation to either of the combatants. The government of the United States represents the people of the United States, not only in the sincerity with which it is endeavoring to keep the scales of neutrality exact and even, but in the sincerity with which it deplores the breaking-out of the present war and the hope that it will end at the earliest possible moment and with the smallest possible loss to those engaged.

"Such a war inevitably increases and inflames the susceptibilities of the combatants to anything in the nature of an injury or slight by outsiders. Too often combatants make conflicting claims as to the duties and obligations of neutrals, so that even when discharging these duties and obligations with scrupulous care it is difficult to avoid giving offense to one or the other party. To such unavoidable causes of offense, due to the performance of national duty, there must not be added any avoidable causes. It is always unfortunate to bring Old World antipathies and jealousies to our life, or by speech or conduct excite anger and resentment toward our nation in friendly foreign lands; but in a government employee, whose official position makes him in some sense the representative of the people, the mischief of such action is greatly increased.

"A strong and self-confident nation should be peculiarly careful, not only of the rights, but of the susceptibilities of its neighbors, and nowadays all of the nations of the world are neighbors, one to the other. Courtesy, moderation and self-restraint should mark international, no less than private, intercourse.

"All officials of the government, civil, military and naval, are expected so to carry themselves, both in act and deed, as to give no cause of offense to the people of any foreign friendly nation, and with all mankind we are now in friendship.

[Signed.] . "THEODORE ROOSEVELT. White House, March 10, 1904."

port that Port Arthur has fallen. This ks confirmation, but no one here will be surprised to hear that both Port Arthur and Vladivostok are in the hands of the Japanese before another week goes by.

The Japanese are to be credited with prudently guarding their equip-ment. If their wavy outnumbers the Russian effective strength in the Far East, it is none the less all the navy they have. They cannot forget that Russia has another navy at home. Even now, there is more than a chance that the Sultan may be wheedled or bribed into letting the Russian Black Sea fleet pass the Bosphorus and Dardanelles. The Japanese cannot afford to throw away a single ship. And they have to their credit the crippling of the Port Ar-thur fleet, the keeping of the Vladiperil and isolation, and the safe cover-ing of the concentration of a large

In all likelihood, they are also holding a line straight across the country from Ping Yang to Wonson, on the eastern coast. They have moved their base from Chemilipo to Chinnampo, close to Ping Yang. The Russians do not so seriously menace

The fact that the Japaner not impetuously pushed on in Kores toward the Yalu is a fairly good indication that their intention is not to strike a body blow on the stocky Russian front, but a "side winder" somewhere on the flank. For this, after a month of steady mobilization at home, they are now ready. view of such calamities as the Baitimore fire or the war in the East. It
is common to hear, even business men
speak of the fire loss as the difference
between the total loss and the amount
of insurance carried. The losses occasioned by fire or war are today' world
losses; every destruction of capital
makes the world poorer, whether the
loss is borne by individuals or corporations. The Wall Street Journal aptly
says: "There are thus some compensating advantages for such disasters as
have taken place this year, but economically considered, they entail an
absolute loss of property which the
whole world must bear, some countries
more than others, but in the end all
will be in a measure affected. The
principal benefit to be derived from
calamity cannot be measured in dollars and cents; it is an ethical advantage. Adversity is often just a thing
that a country needs. A great disasser often does for a people more than
a loag-continued period of prosperity.
It brings out their better qualities, it
tust them on their mettle, and the
world is better for their exhibition
of courage, patience and endurance
under calamity."

something out of nothing.

The fake character of the company's operations was brought out by inquiries from Colorado concerning the standing of the Los Angeles concern, and the statement from Colorado that the name of one of the oldest and best-known companies operating in the Cripple Creek district had been partially appropriated by the Los Ang

The local concern is called the "Crip-ple Creek Consolidated Mining and Tunnel Company," with officers as follows: J. R. Chapton, president and general manager; E. P. Chapton, vice-president: Albert Campbell, secretary; A. J. Sanborn, treasurer.

A. J. Sanborn, transport, secretary;
A. J. Sanborn, transport, secretary;
Inquiry at the offices of the company yesterday afternoon elicited the information from President Chapton that the company is capitalized for \$2,000,000 shares, and that the company is selling stock at \$1 per share for "underwritten" shares and 50 cents per share for "non-underwritten."

PROPERTIES WORTHLESS. According to stories from the best-nformed mining men in Crippie Creek

According to stories from the bestinformed mining men in Crippie Creek
and Colorado Springs, Colo., the properties of the Los Angeles concern are
worth practically nothing, for their
claims are situated nearly three miles
distant from the gold-producing area.
Yet these Los Angeles men are selling
stock on a basis of nearly \$2,000,000 for
the ground.

Chapton outmorgans Morgan. He
coolly informs would-be investors that
they cannot lose by investing in the
shares of the Crippie Creek Consolidated Mining and Tunnel Company and
tells them that "the company proposes to sell 55,000 shares of the guaranteed preferred treasury stock at \$1
per share. These 50,000 shares of preferred stock offered for sale are guaranteed by ten-year bonds of the Granite Security Company of Los Angeles,
Cal., with twenty interest-bearing coupons attached thereto. These interestbearing coupons are guaranteed by the
Crippie Creek Consolidated Mining and
Tunnel Company by an escrow of 50,000
shares of preferred stock in Broadway Bank and Trust Company."

But President Chapton forgets to tell
where the earning capacity of the company comes in. In other words it's just
pay your money for stock and trust
to them to pay promised dividends.

Chapton was saked yesterday:

"Where do you realize money with
which to meet dividends."

"From the sale of ore," he replied.

A QUEER MINE.

This is the amusing feature of the

A QUEER MINE.

This is the amusing feature of the business. The properties of the Con-solidated are situated about three miles from Cripple Creek and in a ter-ritory that never has produced anything. Chapton says he is paying dividends from ore shipments when everyone at all familiar with that portion of the country avers that not a pound of pay ore has ever been marketed from that reighborhood.

REPORTS FROM COLORADO. REPORTS FROM COLORADO.

The properties of this company were examined last fail by John T. Hawkins of Cripple Creek, acting for the Mining Investor. Mr. Hawkins is a well-known mining engineer, who has been associated with some of the largest mining companies in Colorado. He reported that there was no sign of any mill on the property at that time, and no indications that any ore had ever been shipped. It was certain, he said, that no dividends had ever been carned. He found no pay ore, and took samples from rock that appeared most likely to give results.

Samples taken by him and sent to Colorado Springs were assayed and showed only a "trace" of gold. A "trace" is the assayer's term for a visible but unweighable amount of mineral in the specimen assayed.

Claude Sachs, editor of the Mining Investog and recognized as one of the ust-posted mining men in Colorado.

Claude Sachs, editor of the Mining Investog and recognized as one of the Let-posted mining men in Colorade, concludes a long exposé of this concern by saying:

"This report of Mr. Hawkins and the result of these tests, coupled with the fact that no mining operations are carried forward on the property, shows up very clearly not only the wild-eat nature of the whole reoposition, but determines very surely the fraudulent nature of the the hole reoposition, but determines the whole reoposition, but determines the salary of \$50 per month; the secretary, \$30 per month, and the treasurer, \$25 per month, which on a squeeze might be enough for the Chapton family to live on if they do not have to pay out too much of their salary in the form of dividends." SAN PRANCISCO. March 10.—[Exclusive.]
Dispatch.] The market for fruits was practically dead today as the result of the storm, and prices were largely nominal in the absence of buying interest. In oranges, few orders were placed for shipment to the northern markets on today's departing steamer, but outside of this movement business was not even of routine order. Large lines of all grades of navels were available, and the general market reflected the casiness mosed the preceding day. Heavy buyers could have secured market concessions. Oranges continued firm under scant supplies, but offerings of other citrus fruits were fully up to requirements. The raging storm interfered with, business throughout all departments, and current values were more or less easy and irregular. "My niece's little baby boy, two years old, was so badly afflicted with eczema that he needed constant watching. It was all over his face and he scratched the sores constantly. Mornings his clothes would be stained with blood, and his face and hands would be covered. His family never could take him out, as his face was always full of large sores. They had medical treatment, and tried everything they heard of. She commenced using the Cuticura Remedies last spring and found that at last she had a wonderful healer: The sores left his face and he was entirely cured, and now his face is as smooth and rosy as though no sore had ever been there to mar it."

LANGHAM, DYING, HEARS OF

She Lives Merrily in Paris, He Ne-glected on Ranch—Remains of Father-In-Law of German Am-bassador Taken to San Bernardino.

SAN BERNARDINO, March 10.—The remains of Charles E. Langham, father-in-law of the German Ambassador at Washington, were brought here this morning from Etlwanda, where he died early Wednesday morning. Langham had just returned from the hospital at this place, where for several weeks he had been under treatment for a stroke of apoplexy, and was supposed to be out of danger.

The community in which he died comments severely upon the lonely manner of his life, he having been practically ostracized from his family, as his wife and youngest daughter SAN BERNARDINO, March 10 .- The

manner of his life, he having been practically ostracized from his family, as his wife and youngest daughter made their home in Paris. It is claimed that in order that they could be provided with the luxuries of a fashionable life they received the income from Langham's half interest in a large mercantile business at Denver, while he was forced to practice rigid economy on his ranch, which was just coming into bearins.

The day before he died he received a letter from his wife in Paris describing the whirl of fashion about her, and announcing that their youngest daughter was engaged to a French nobleman, the marriage set for June. In commenting on the letter Langham exclaimed that probably his wife would be willing to make a hone for him in California after the marriage, that it was said his daughter was marrying well, and as his wife was satisfied he supposed he should be content.

Until a few days ago Langham lived the life of a bachelor, cooking his own meals and doing his own housekeeping.

In the dying statement of the late C. R. Lioyd it appears that he declared that William Boxall 'had demanded 25,000, while Lloyd was held a prisoner in his own home, and after refusing the demand he attempted to escape and was shot by Boxall. The dying statement has been given to the public by the District Attorney in view of the criticism which the recent trial of Boxall caused. The capitalist charres Fred Lloyd with being the arch conspirator, and that under the Jerms of an agreement between the Boxalls and young Lloyd the latter was to get \$10. roung Lloyd the latter was to get \$10,-

REDLANDS.

REDLANDS, March 10.—In anticipa-ion of the city election, April 11, one icket, termed Citizens', has been ticket, termed Citizens, has been placed in the field by petition. The nominees are H. L. Graham, J. J. Suess, W. C. Hargraves and A. E. Brock, for trustees, L. W. Clark for clerk, J. E. Wallace for marshal, and F. P. Morrison for treasurer, beside board of fitteen freeholders to draft F. P. Morrison for treasurer, beside a board of fifteen freeholders to draft a new charter for the city.

There was a bolt on this ticket on the part of some citizens and under the title of the Good Government Party, a second ticket has been partially completed with William Fowler, C. F. Balley, C. E. Lehman and A. E. Brock as trustees. The Freeholders list for this ticket is to be completed at a mass caucus Monday evening. The Good Government people desire a clause in the charter allowing the citizens to vote whether or not the wine privilige with meals shall be extended to hotels and restaurants.

A petition protesting against a few persons taking it upon themselves to nominate the Citizens' ticket without a public mass meeting has been signed by many, and the Lugonia side of the city is vigorously protesting because it is not represented on either ticket. A third ticket may result.

TRADES CHILDREN FOR A LEASE.

STRANGE COMPACT BETWEEN RIVERSIDE COUPLE.

Father Surrenders Care of Chil-dren to Mother in Return for Control of Farm, But Stipulates They Shall be Kept from Stage Until Fifteen Years Old.

RIVERSIDE, March 10.-Growing out of the long-drawn-out litigation between the Anaheim Ditch Company and Fuller Bros., there comes a story of domestic infellelty. This was evi-dent from a peculiar agreement which has just been placed on record in the County Recorder's office. Dalsy and O. B. Fuller, husband and wife, are the parties, and they make stipulations as to water rights and the care of their two minor children. The wife is to lease what is known as the Fuller ranch to her husband and Fred Zuck-er, at a monthly rental of \$85, and she, in turn, is to have the right of she, in turn, is to have the right of conveying irrigating water through the famous Fuller ditch. By this mutual understanding the father is relieved from any further care of the children, except that he is to fost all doctors' bills. But he puts in a strange provise that they are not to be trained for theatricals and that they are not to be allowed to go on the stage before they have arrived at the age of 15 years.

The written agreement is properly prepared, but fails to give further information regarding this troubly. Friends of the contracting parties say there is much behind the proceedings, but that for the present, at least, nothing else will be given publicity.

WOMEN'S CLUBS.

In club circles one hears discusse on, every hand the important topic of the presidency of the General Federa-tion of Women's Clubs. Mrs. Denison, incumbent, has been slow in stating her intentions and this has caused a hesitancy in putting forth candidates A St. Louis paper of a recent date states that Mrs. Denison has said she

will not again run for the presidency, and that this leaves the field clear for the two most likely candidates, Mrs. "Bob" Burdette of Colorado and Mrs. "Bob" Burdette of California.

Such a statement coming from the city in which the Biennial will take place in May should to some extent relieve the minds of those interested in club politics, and a resolution which was passed at the recent meeting of the California State Federation, and indorsed at the Ebell Club Monday afternoon, would indicate that some rumor of these conditions had reached the State. This resolution was introduced by Mrs. C. Masom Kinne of San Francisco, one of the most influential women in the State convention, and offered the name of Mrs. Burdette as a candidate, advising the delegates to the Blennial to be ready to propose Mrs. Burdette for this honor, feeling assured they would have the enthusiastic support of the federated clubs of California.

support of the federated clubs of California.

At the same interesting session of the Ebell Club a fine report of the recent federation proceedings was read by Mrs. J. B. Millard, retiring secretary of the State board. Mrs. Milliard was accorded the unusual honor at the recent federation meeting of having her work publicly recognized by a resolution from the parliamentarian of the convention, who stated that she had visited many legislative bodies and had attended all the large conventions of women's clubs, but she had never seen such active and expeditious work as secretary, as that done by Mrs. Millard. Mrs. Millard was then given a rising vote of thanks from the body. She has had long training in the work of secretary, as she has served in this capacity for ten years in the Society for the Prevention of Cruelty to Chilldren and Animals, and also made a spiendid record as secretary of the Local Blennial Board in Los Angeles two years ago.

Plans for Arbor Day.

The Wednesday Morning Club has been active in its interest and preparation for the Arbor Day celebration. The Arbor Day committee, Mrs. E. F. Trask, Mrs. Delia Johnson and Mrs. R. C. Smith, has arranged for the planting of six trees in Elysian Park to belong to the club, each tree gepresenting a year of club life. Some mark of ownership will be upon the trees and the members expect to take part in the exercises, putting off their social afternoon from the 17th to the 24th of the month, on this account.

A delightful luncheon was given by the Shakespeare section of the club Wednesday, with Mrs. Greenleaf as guest of honor. Toasts were given by Mrs. Adams and Mrs. Foster and responded to in delightful vein by Mrs. Greenleaf and Mrs. Henry Brett. Mrs. O. H. Hubbard, president of the Shakespeare alumni of the club, invited the members to partake of her hospitality and repeat the event as her guesis.

As early as 1522, Tucson, Ariz., was established. It was not incorporated until 1871, but its first building was erected nearly 350 years before that time.

At Casa Grande is a relic of prehistoric times -a ruin that dates back hundreds of years before the Spaniards came. San Gabriel Mission, seen from the trains of the El Paso-Rock Island Route, is comparatively modern; it was built in 1771.

There are innumerable other evidences of a civilization that was old before New England was new, but these are sufficient to show that the El Paso-Rock Island Route is the most interesting highway across the continent.

From a climatic standpoint it has no equal, in that almost all the way from Los Angeles to Kansas City it runs through a land where winter is unknown.

PLOW CASE IN COURT.

Owner of Disc Patents Sues to Restrain Fresno Man Selling Without Paying Royalty.

M. T. Hancock of Chattanooga, Tenn., owner of the valuable patents under which the famous Hardy disc plow is manufactured, yesterday filed in the United States Circuit Court, a bill in equity against James Porteus of Fresno, alieging that he is selling and has heretofore sold large numbers of plows made over these patents without asking the leave of Mr. Hancock or any of the various companies engaged in their manufacture. The main corporation is at Chattanooga and the California house is Baker & Hamilton, who have a branch in this city.

a puff of wind took his hat from his head and carried it far out over the sea. Involuntarily, he reached for it, sprang lightly to one side and fell over the edge of theplanking into the roaring waters.

No one had seen him disappear, darkness was falling fast and the waves beating against the great timbers of the pier threatened a death more terrible than drowning. To add to the handleap which fate seemed to have placed upon him, McCandless is paralyzed in both arms. As he afterwards said, the horror of the first few seconds after he struck the water was overpowering—he was fairly whispering with death.

The first shock over the linstinct of self preservation exerted liself. For two hours, re struggled in the storm-tossed waters and finally, as his strength seemed exhausted, he felt the sand beneath his feet. BOY CONFESSES ROBBERY.

Officers Millard and Lynn at 10 o'clock last night found a nine-year-old boy lying assieep on one of the benches in the Salt Lake Depot. The lad said he was waiting for his mother, who was stroiling on the beach with another woman. The officers failed to find either the alleged mother or her companion, so took the youngster to the City Jail.

The boy said he had 75 cents, but when searched a lady's purse containing \$1 was found in his possession. The lad then confessed that his name was Asel Lambert, son of a carpenter living at No. 1340 East Twenty-first street, Los Angeles. He entered the house of Mrs. Bullock, in the rear of his own home, yesterday morning, and, seeing the purse lying on a trunk, appropriated it and then came down to the beach to have a good time. MOURN-FLIGHT OF GAY SENOR.

Meteoric Career of Don Jose Sosa, Saddler,

Sweeps Across Santa Monica's Social Firmament.

Leaves Broken Hearts, and Likewise Creditors.

Where is Don José Sosa, the gay and ir Castilian?

Six months ago Señor Sosa burst up-on the scene at Santa Monica-by-the-Sea and added his picturesque pres-ence to the gayety of that cosmopoli-

ence to the gayety of that cosmopoli-tan city. In a short six months he ac-complished wonders in the realms of society and finance.

The sefor's coming, like his going, was not announced with the blare of trumpets, nor was it bulletined in the official gazettes. It is nearly a week since he was last seen there, and his creditors, and financial sponsors are busy.

in her war against the Boers, to a proud position in the business and so-cial circles of Santa Monica is a long step, but it was successfully taken by José Sosa. After he had taken his great stride he stepped out into the unknown as suddenly as he stepped into the glare of popularity in the gay seaside village.

How much of Sons's life story, as told by himself is true, matters not. He sair he was of pursonate the flag of England on some Pacific isle, about forty years ago. He learned the saddler's trade when young, and during the Boer War was a saddler's sergeant in Her Majesty's service in South Africa. After the war he drifted to America and decided to locate in Southern California and go into business for himself. But he had no capital. Poor but not too proud to work.

SOSA AS FINANCIER.

SOSA AS FINANCIER.

After three months' faithful service in the employ of Mrs. Holmes, Sosa wanted to open a harness shop in Santa Monica, and if Mrs. Holmes would endorse his note for \$150 at the bank, the thing could be done. Mrs. Holmes notified the Merchants' National Bank of Santa Monica that she would go Sosa's security for a loan of \$150. The cashier of the bank insisted for her own protection that she secure some other responsible person to sign the note with her. Frank Ockert, a Santa Monica contractor, was the other obliging person.

The loan was secured January 31, 1963, for three months, interest 1 per cent a month, due the first of every month. With the money and goods he bought on credit, on recommendation of his Santa Monica friends. Sosa opened his shop at No. 214 Utah ing business. SOSA AS FINANCIER.

street, and was soon doing a flourishing business.

Sosa's saddlery was the fashlonable
place to do business in that line. There
was one other harness shop in the littie seaside city, when Sosa's sun rose
on the business horizon. Competition
soon became so hot that the proprietor of the original shop, H. L. Berger,
lost his reason over seeing his trade
slipping away, and is now confined in
a private asyluw.

Sosa became a social as well as a
business favorite, and every Sunday
he could be seen driving a high-stepper with a pretty girl in the buggy beside him. He is said to have been
particularly smitten with a charming
young lady at Sawtelle, and made frequent trips to that suburb. It is also
said that some of the sporty young
men of Santa Monica took Sosa out
to Sawtelle at divers times to initiate
him in the great American game of
draw poker, which has recently been
prohibited by ordinance in Santa Monica.

LADY OR THE TIGER?

Whether it was poker or girl, that caused Sosa's frequent trips to Bawteise, there it was that he was last seen. A young man said to be a relative of Sosa's Sawteile sweetheart appeared at the bank in Santa Monica last Monday, with a check for \$34, saying it was given him for cash which he advanced to Sosa the previous evening. Since that time the haunts which once knew Bosa, know him no more. The bank informed the holder of the \$34 check that Sosa's account was already overdrawn and that he had defaulted on the interest of a note that he owed the bank. About this time more checks with Sosa's signature began to bob up from all directions. LADY OR THE TIGER?

whisky bottles. Sosa's trunk, his clothes and everything in the way of personal property had vanished.

He owed a Los Angeles wholesale house a balance of \$115 for saddlery goods, and another Los Angeles house \$65 for a stock of buckskin gloves.

C. G. Bundy, a Santa Monica liveryman, has one of Sosa's unhonored checks as a souvenir of Sosa's buggy rides, with his Sunday girl. The proprietor of the restaurant where Sosa took his meals has a score of \$3.55 chalked up against his late star boarder. Sosa's clerk in the harness store is whistling for his pay/and a few laborers were touched for \$1.50 canch by Sosa as late as last Saturday.

a rew iscorers were touched for \$1.50 cach by Sosa as late as last Saturday.

Maddest, if not saddest, of all the creditors, is C. Johnson of C. Johnson & Co., merchants of Ocean Park. Johnson cashed a \$5 check for Sosa last Friday, and as he had proved himself an easy mark, Sosa returned on Saturday and induced him to cash another check for \$10. Both have been dishonored at the bank. Johnson swore out a warrant for the arrest of Sosa yesterday before Justice Jenness, on the charge of obtaining money by false pretenses, but the constable doesn't know where to look for \$40 culprit.

Sosa had been talking lately about going to the Far East to help the Japs to lick the Russians. It is surmissed that he went to San Francisco to sail for Japan with a view of becoming saddler to the Mikado.

It is estimated that he saddled debts amounting to about \$500 on creditors in Southern California.

The first fire, at the Olive stables and the addoining property, burned all night. The embers are still smouldering and the fire will not be entirely out for several days. The loss was greater than at first reported and is

out for several days. The loss was greater than at first reported and is now estimated as approximately \$25,000. Thirty-two horses were burned to death, about the same number of rigs destroyed and three buildings seriously damaged, one of them, the livery stable, being destroyed.

Fanning & Son, owners of the stable, expressed the opinion yesterday that the fire was incendiary. There was no fire in their building and in support of their theory of incendiarism they point to the fact that two previous attempts had been made by unknown persons to burn their property. Their loss will exceed \$18,000, the remainder failing upon their customers and the occupants of the bouses adjoining. During the fire two trunks filled with property belonging to the occupants of the bouses adjoining. During the fire two trunks filled with property belonging to the occupants of the bouses and the rooming-houses near the stable were stolen.

At the second fire, the feed mills at Fifth and San Pedro streets, the loss will reach \$12,000 or more, with only partial insurance. Several horses were burned to death, the exact number being unknown because some were saved and the bodies of several were almost entirely consumed.

The third incendiary fire caused the destruction of the African M. E. Church on Azusa street near San Pedro. This fire was discovered about 4:30 o'clock yesterday morning. The loss will amount to \$3000 or more; partially insured.

County's Only Natural Lake Suddenly Gone.

Mud Flat Marks Spot in Antelope Valley.

The only natural lake Los Angeles ounty could boast of has completely nd mysteriously disappeared. Hunters who have returned within the last day or two from trips through the Lancaster country report there is nothing left of Elizabeth Lake but a huge mud flat of sog and marsh. It was at one time a lake three

miles long, lying picturesquely in a mountain-boxed valley across the range back of Pasadena.

Around it hung many of the most charming romances of the early days of this county. Perhaps the old lake felt out of place across the Gripore. felt out of place among the Gringos.

At the head of the lake was the old Leonis Rancho, the cause of over a hundred lawsuits in the courts of this county, and the scene of a fascinating story of early California life as romantic as "Barmona".

Elizabeth Lake once figured also in an amusing Bret Harte sort of story of the working of early California justice.

DEATH OF MAJ. GARD ENDS ACTIVE CAREER.

GEORGE E. GARD is dead. After the greater part of it closely allied with the history of California, death with the history of California, death came to Maj. Gard at 3:45 o'clock yesterday afternoon at the home of his son, W. B. Gard, No. 367 Winona avenue, Pasadena.

It was in the early days, as Chief of Police of Los Angeles, that Maj. Gard or Police of Los Angeles, that Maj. Gard or Newton Brown, in Mexico, and exposure incident to this investigation brought on an attack of pneumonia from which Gard never recovered. For

While he was serving as United States Marshal the Grand Army of the Republic honored Maj. Gard with the office of department commander of the Pacific Coast district, composed of Callifornia, Nevada and Arizona. As

lake this year is said to be due to two causes, the drought of this winter, and the fact that the land has been cultivated.

In the old days the land about there was used for sheep grazing, and the soil absorbed but little of the moisture, letting it all go to the lake. Now the soil is tilled; the water soaks in.

The land between Elizabeth and Hughes lakes has been reclaimed to a large measure for farming purposes. Doubtless, in time, the mud flats which are all that is left of the lake will also be fine farms of moist land. As the people have made a reservoir of Hughes Lake, no hardship will result from the drying up of pretty Elizabeth.

It will be something of a shock to one's finer sensibilities, however, to go up expecting to see the beautiful sheet of water the maps show, and find nothing but deres upon acres of dank, sloppy, googey, slimy mud.

The railroad men, forgetting their sown troubles for the time being, rushed to the rescue with the old man, a ranchman named Smith. The old man explained to them as they ran that his hired man had gone to the bottom of a well about fifty feet, deep to cleanse a pump with gasoline and had been overcome with the fumes of the volatile fluid.

overcome with the fumes of the volatile fluid.

Smith was not strong enough to get the man out of the pit by himself, but when he had secured help he herolcally descended into the well and tied a rope around the insensible man's body and gave the signal to Stephens and McClure to draw him up. The victim of asphyxiation revived after being hauled out of the pit, but a few minutes more in the gasoline fumes would undoubtedly have proved fatal to him.

Smith nearly lost his life while in the well fastening the rope around the other man. The fumes of the gasoline almost overcame him and he was harely able to climb back up the ladder. It was a close call for both men, and but for the accident to the railroad velocipede. Stephens and McClure would not have been there to do the life-saving act. Not all accidents turn out so fortunately.

THE UMBRELLA CHUMP.

Although some men have conquered worlds and others have learned to spell Russian war names, it is said that the man never lived who could hold an umbrella over two and not make an idiot of himself.

Last night, an attentive young man was trying to get a purnle hat (alse a girl or some such a matter of minor importance) into a Redondo car.

"Come," he said, "we must get this car or you will certainly be soaked through standing on this damp corner." Under an awning and umbrelia!

A car had just started on Second street.

He gallantly dashed off through the stream, splashing water all over her, taking the umbrella with him, leaving her to follow in the rain. She plunged through the water after him and gos on the car, at which he had been wilding waving the umbrella.

He seated her politely in the car and with conscious virtue handed her the umbrella, nicely shut, of course of great use now her hat was ruined.

She nodded her head as though she were thanking him; but as he left the car, she gave one look after him and if looks could kill he would have keeled over a corpse as she shook the water out of her lovely chapeau—ruined by the bilthering chump.

But the rain's great tragedy was that of a fat man who spent exactly twenty minutes building himself across Second street and fell through into the water.

Fire Engine Bids

Fire Engine Bids.

Lively competition for the contract to supply the city with three fire engines is expected at the session of the Supply Committee this morning. The Council in the exercise of its discretion determined not to allow the Fire Commissioners to make a recommendation regarding fire hose or to impress them with their own insignificance as appointees of Mayor Snyder. E. A. Wilkinson of the W. S. Nott Fire Engine Company and R. S. Chapman of the American Fire Engine Company have been explaining the good points of their respective engines since the bids were opened last Monday, and the rivalry between them is very keen. The American Fire Engine Company is frequently associated with the trust, while the Nott company claims to be an independent concern. The bids are practically the same. The American offers three engines of the second size for fit, 250, and so does the Nott Company. The latter, however, asserts superiority for its spiral boiler and offers to supply the three engines with submerbed boiler somewhat after the American company's type, for \$300 less. Some kind of a public test may be arranged to determine the relative merits of the engines. Guarantees and bonds are offered by both companies, and if there is any difference in the engines it lies in technical workings with which the average layman is not at all familiar. It will probably come out this morning whether the Supply Committee numbers any boller experts.

WRIGHT "UP AGAINST" A GET-RICH-QUICK SCHEME.

Suit Brought Against Oily Orlie, H. E. Kemp, R. M. Vail and the Twin Corporations They Represent, to Recover Diamonds Contracted

C. Harry Wright has had the daring to try to get blood out of a stone, in other words, Orlie J. Watkins. Yesterday afternoon Wright began suit against Watkins in his corporate as well as his individual capacity, the defendants being the International Credit Company, the American Loan and Trust Company, Orlie Watkins, who poses as the secretary of the Loan and Trust Company, H. E. Kemp, president of the International outfit, and R. M. Vall, secretary of the same sweet-smelling corporation. The ac-tion is to enforce a contract or recover

into the spick and span three-story addition to the Cliy Hall. Instead of one little room the department now has nine rooms, any one of which is as commodious as the one so long used.

The entrance to the office is outside the mein building and the street department has constructed a cement and asphait walk to the door and around to the fear of the addition where there are three rooms sacred to the row of smallpox.

The Tax Collector has decided that he must have more room and the Building Committee of the Council is trying to figure out some way of providing to figure out some way of providing the figure out some way of providing him with additional space.

About the only way open is to move the public library from the building and a plan to rent a floor in some building; was under consideration yesterday. Several proposals have been made to the Council and it is not unlikely that the library may be moved to rented quarters before many days. Councilmen realize that if the library is not provided with quarters outside of the building, a considerable sum of money must be expended in strengthening the floors on which the books are kept. It was estimated yesterday that the cost of strengthening the floors on which the books are kept. It was estimated yesterday that the cost of strengthening the floors on which the books are kept. However, should it be decided to keep the library in the building and

The courtroom was filled early, and when court opened a mass of strugiling humanity filled every niche of vantage ground. There were fust three women in the crowd.

When the case was called the counsel for the defense were ready to recede from their position taken before. Earl Rogers was prompt in explaining to the court in regard to the afflavits, for a preparation of which adjournment of time for sentence had been granted, that they had no substantial basis. He said the newly-discovered evidence, that they had no substantial basis. He found, was cumulative and would therefore not warrant a new trial on the ground; the other afflavits bore upon the credibility of a witness, and taking it all together Rogers said that he and associate counsel had concluded to rest on the record.

"Overruled," said the court, passing on the motion for a new trial.

Then Mr. Rogers presented a motion in arrest of judgment, explaining it was not in the proper statutory form.

STORMS.

(Continued from Fir.t Page.)

East Seventh street is in progress there, and the grade had been lowered to a degree which permitted the flood of water which rushed down Alameda street to back up along Seventh. This back water, together with that which flowed from Central avenue and other streets in that part of the city, caused a veritable deluge in the vicinity of the Bishop plant.

streets in that part of the city, caused a veritable deluge in the vicinity of the Bishop plant.

On the Seventh-street side of the factory there is stored in the basement all the power plant of the corporation, consisting of engines, bollers, dynamos, air compressors and other machinery, all of it of the most modern type and ail practically new. Of course the flood did not materially damage the bollers or engines, but the dynamos were ruined and the delicate machinery of the air compressors was filled with sediment, to remove all of which will require several days.

Fortunately the basement of the main plant, stored full of valuable stock, was not connected with this machinery basement, and although the water was between six and eight feet deep around the machines, there was hardly a drop in that portion of the cellars in which the reserve stock is stored.

The loss will amount to several thousand cannot be determined until the cellar is pumped out and a careful examination made of the contents. The flooding of that portion of the plant will not cripple the company's business in the least, because there is an enormous reserve stock which may be drawn upon to fill all orders until the power plant is ready to resume operations.

CASINO SUFFERS.

CASINO SUFFERS.

The Casino might have been out of basicess last night if it hadn't been for the Mayor. As soon as he learned that a disastrous flood was inundating dressing-roomdom he hurriedly communicated with the fire department, had an engine gotten ready, and sent had an engine gotten ready, and sent the assistant chief and a force of men

had an engine gotten ready, and sent the assistant chef and a force of men down to pump.

The trouble at the Casino all came from the work of its rival, the San Francisco Tivoli people, who are excavating for a theater at the rear of the Casino's stags. They intend to dig thirteen feet for a foundation, and have already gone seven feet of the subterrahean fourney. This trench, only slightly protected by a thin wafer of earth, stood open all day, and last night was suddenly filled by a flood which burst its bounds near Main street, running back over the property hear by. The protecting wall gave way, and this threw the whole force of the muddy damp against the fundamental masonry of, the Casino stage. The bricks were not waterproof, and the assistant manager at 7 o'clock found streams pouring into the dreasing-room space, and a lake six inches deep on the floor. It was not only a matter of chorus gris' convenience, but of valuable rrooperly as well. Nearly all of the completed costumes for "Twirly Whirly," the next production, were in hampers on the floor, and Letto estimates that these were damaged to the extent of \$2500. Besides, in the principals' dressing-rooms were many articles of their own clothing and valuables which suffered by the water.

Two mays hands, two policemen and a mouse fireman volunteered for the recous work outside, and by vigorous use of shovels hastily berrowed from the Van Nuys Hotel soon had the carefully-plumbed and squared Tivoli hole filled up.

Below stairs the first choral member had to go on a fishing expedition for ser clothes and then climb on a chair

filled up.

Below stairs the first choral member had to go on a fishing expedition for her clothes and then climb on a chair back to put them on. Stage Manager Chick made temporary floors by yanking off all the doors and laying them on sawed-off timbers, and in this way the young women finally got dressed for the first act.

A performance was given last evening only under extreme difficulty, but from the front everything was as "lovely" as though all circumstances had been favorable to the highest degree.

CARS STOPPED. LINES TIED UP HOURS.

LINES TIED UP HOURS.
Service was stopped on several streetcar lines last night.

The Temple street, with the heavy
grades and slippery tracks, did not run
through to the end from 6 o'clock on.

The big washes on the East Side
stopped the Boyle Heights and Brookign-avenue for two hours or more.

All the lines took off their extra cars
early in the evening and cut down the
service to ten-minute cars.

On Pico Heights, at Arapahoe street,
they had to get a good start and coast
through six or seven inches of water,
being afraid to leave the juice on; the
controllers were in danser of beinburned out if the underpinning touched
the water. Each trip it was a toss-up
whether the sand on the track would
stop the rars or not, but they usually
got through all right.

The wrecker was out several time,
metably on the Templestreet lines.

which is a bad one in wet weather.

DERAILED CAR FLOODED.

Heavy as was the downpour in the usiness district of the city, in East Heavy as was the downpour in the business district of the city. In East Los Angeles it was or appeared to be much heavier. Along East Main street on the route taken by the Mapie-avenue-Eastlake-Park cars, the storm symed to be of greater intensity than in other parts of the city. That thoroughfare looked like a river for more than two hours and early in the deluge attack and the car service there was practically abandoned. One car of the Mapie-avenue line southbound struck a crossover, one truck taking the crossed track while the other remained on the main line. The car was thrown almost at right angles with the tracks. To get it back in position in the storm was out of the question and the motorman and conductor had to wait until the rain stopped. Before that the water rose to the floor of the car and the two men had to climb to the seats to keep from standing in water. The flood soon subsided, however, and the car was righted with the assistance of several railroad men who were cur route from the Southern Pacific shops to their homes. There were no passengers on the car.

ROADBEDS HOLD WELL.
Out toward San Gabriel the precipitation was much heavier than in the cliy. The right of way of the Pacific Electric was flooded in numerous places, and there were a few small washouts, but they were not sufficient to stop the cars, the road having been built in a manner that would withstand twice as much rain. For three miles on one stretch the tracks were covered, and in running over that part it was necessary that the cars be run slowly. This caused some delay in traffic, but, excepting the lost time, the service was about as it usually is. This is the drst time that that new line has been tested by a heavy rainstorm.

The newer Whittier electric line also.

storm.

The newer Whittier electric line also withstood the torrents which dashed down from the foothill country. At many places obstructions were washed across the rails, and the removal of these caused some delay in the traffic, but the oars moved as usual, and there were no washous.

Death of King Blakesley Due to Poison Taken Hours Before Body

The Coroner's investigation into the death of King Blakesley, whose body was found in his father's rooming-house at Third and Main streets, Wednesday night, disclosed that the young man had

committed suicide.

At the time the body was found, there was discovered near it a glass containing a solution of some kind of crystals.

This was analyzed yesterday, and the contents of the stomach of the deceased also examined. It was found he had taken cyanide of potassium. What prompted Blakesley to take his

OCAMPO CONVICTED.

Court and Jury Make Quick Work of Smuggler of Chinamen Acress Border from Mexico.

At 4 o'clock yesterday afternoon the case of a Mexican named Ocampo, charged with having smuggled Chinamen across the border from Mexico, was given to a jury in the United States District Court, and forty minutes later he was found guilty, the verdict returned and the sentence imposed. Judge Olin Weilborn didn't wish to keep the Mexican with an Irish name is suspense, and had the dose already mixed when the jury called for the prescription. He gave Ocampo six months in the San Diego County Jall and a fine of \$1.

No new step was taken in the case of Lopez, the accomplice of Ocampo, who was in the employ of the latter. By order of Judge Weilborn Lopez will be held in the San Diego County Jall to await further order of the court.

PRICE AND POSTAGE

Chicago—a jurist who is given to the speaking of plain truths in a plain, lunt way—is quoted in a New Or leans interview as declaring that "the munity at this time as is the man who will corner some necessary self, regardless of the people. I do not mean to deny the union laborer Kohlssat, "but I do say that he has right by force to attempt to prevent another man earn-ing a living for his family. This is a species of anarchy that la-bor unions must eliminate."

The language of Judge Kohlsaat is obviously true that there can be no saful contradiction of it. Not until a comparatively recent time have the American people come to a reali-zation of the fact that organized laor is systematically seeking to build p a monopoly in this country as odious and oppressive as any form of monopoly ever attempted; more odious and oppressive, in some respects, than any monopoly ever attempted. Now ought home to the consciences of the people, they perceive the evil in its true light, and there has been, in blic opinion on the so-called labor on: and the new alignment is not nism and its methods.

We have no words of condemnation tly strong with which to deunce the men who seek to "corner" saries of life in order to make oney out of the necessities of their illow-men. Such efforts are indeed ving of condemnation. Yet they ordinary commodity, such as wheat or cotton, is necessarily of brief durarously to those who attempt it. But those who are seeking to "corner" the labor market intend to make the menopoly permanent. Labor is a commodity, as much as is wheat or cotton. "Recognition of the union" is an elastic and seem-ingly innocent phrase which has been "What is he worth?" That is to say, made to cover one of the ugliest and most unreasonable demands ever made on behalf of organized unionism; for behalf of organized unionism; for recognition of the union, in the sense in which the unions understand and use the term, means nothing more now less than the employment of members of the union to the exclusion of aid persons who do not belong to the union.

Judge Kohlsaat is entirely right in anarchy that labor unions must eliminate." They must eliminate it, or they themselves will be eliminated from the industrial equation. They cannot support, before an enlightened sition that to a few men, banded together into secret proscriptive organizations, shall be given practically all the important work to be performed, while the great mass of workmen, not so banded together, shall be refused employment simply and solely because they prefer industrial freedom to the bondage imposed by member ship in the union.

NO FUEL FAMINE.

A few years ago, articles frequently appeared in the papers and magazines on the fuel problem—as to what mankind was to do in a few hundred, or even scores of years, to keep warm, and propel machinery, after the coal beds should have been exhausted, or the available supply be so far below ground that it would be impracticable to work it. Long arguments man race faced a grave danger in this direction and that we might, if not in this, then perhaps during the lifetime of the coming generation, be in danger of freezing to death—except, of course, in such highly favorable sec-tions of the world as Southern Cali-

Few such articles are seen nowa-days. Two things have happened during the past decade to entirely change conditions in regard to the fuel supply of the world: First, the development and general adoption of fuel oil, and, secondly, the increasing ing been conclusively proved that electricity may be carried over one hundred miles from the source of supply without any great loss in trans-mission. Nor need we fear that the supply of petroleum will fall short, within a reasonable time. The earth appears to contain an immense supply of this useful material, in regard to the origin of which scientists still

differ. New deposits are continually being discovered, and there is no reason to believe that the present pro-ducing fields of the world are more than an indication of what, may be developed in the near future.

we have also only begun to develo that still cheaper source of energy. The harnessing of Niagara is an indication of what may be done in this direction, before many years. Here, in Southern California, we had until ring of condemnation. Yet they recently the longest electric transmocent in comparison to the mission line in the world, from the of trade-unionists to "corner" Santa Ana Cañon to Los Angeles. Santa Ana Canon to 100 August.
This has since been exceeded in length by another system in Northern California, and that, in turn, will be cast in the shade by a line from an electric power plant in the mountains of Kern county, which is being constructed into this city.

Even coal itself is by no means so scarce as some pessimistic prophets would have us believe, a few years ago. In China alone there is probably enough coal underground, at a reasonable depth, to supply the world for a century. We may safely dis-miss from our minds any anxiety in regard to the possibility of our im-mediate descendants having to freeze to death, even if they are so unforblizzard regions,

THE MANIA FOR BIGNESS.

One of the peculiarities of Americans that is apt to strike the "intelligent foreigner," although usually unremarked by ourselves, because we have been brought up to it and accus-tomed to it, is the mania for everysome extent to the fact that we inhabit a country of vast extent. The old story about the American traveler in England who was afraid to get out of bed at night for fear he might fall off the island, illustrates this idea. In er man earning a living for his no other country of the world, except Russia and darkest Africa, are distances so immense. We boast of our big blocks, often regardless of whether n carried on rather for the they are architecturally beautiful or made to cover one of the ugliest and not how much his worth from a stand-

apples, and peaches, and so forth. In fact, we are inclined to eat with our eyes rather than with our palates, utterly regardless of the fact that as a rule the big fruit does not begin to compare with the smaller specimens in flavor. Anyone who has tasted the little wild mountain strawberries, as they are served on the breakfast tables of Switzerland, and compared them with the big mammoth berries of California, will see the point. The best of all the peaches is the little strawberry peach, that comes early in the season and the pear with the greatest flavor is the little Seckles, which winds up California cherries are handsome to look at, but they have not the "twang" of the little black cherries that are raised in the Schwarzwald, and largely though they are also utilized in the fruit cures that are popular in Europe The same thing is true of flowers. The big California violet, which created such a sensation, does not begin to compare in perfume with the modest wood violet that we used to hunt in the woods when we were children.

We should not allow this mania for bigness to blind us to the fact that a declaring that this war upon the rights of non-unionists "is a species of its size. On the contrary, the choicest articles are often done up by nature in small packages, whether in the of human beings.

An exhibit of fine undermuslins

The standard of quality—in materials and trimmings and needlework—is higher than ever. We have refused all but garments of full, unstinted cut. You'll find that, price for price and quality for quality, no undermuslins effered in

town equal ours.

The proof is not in descriptions or in figures, but in the garments themselves. View this exhibit. Compare. What you learn will be valuable to you in the future, if you need nothing

of the sort now.

A few price-hints, just to show you what to expect:

UP TO THE STANDARD.

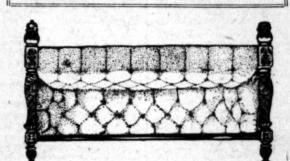

And the word "standard" used in connection with our store has a higher sense, means more than it does ordinarily. We have set a high standard before us that we are living up to every day. Only reliable groceries are handled here—reliable for us to sell, for you to use. Then our store is kept clean—just as clean as a Dutch kitchen. Best groceries kept in a clean way. Isn't that a matchless combination?

FOR MORE MEMBERS.

Dealers—Dues to be Doubled.

To increase "s memberchip the Lo: Angeles Realty Board will in future, include reputable dealers in adjacent cities and towns. This con-

Realty Board May Admit Out-of-to-

clusion was reached yesterday at the midday banquet of the organization, held at Levy's.

Among other matters discursed was the placing of signs upon listed property. A resolution was adopted providing a standing reward of \$25 for the arrest and conviction of any person unlawfully and mcliciously defacing or removing such signs.

Addresses we've delivered by R. D. List, G. G. Johnson, P. J. McGarry, M. W. Atwood, Charles O. Goodwin, Lee McConnell, M. Cogswell and S. J. White. Several names were presented and accepted for membership. Notice was given that as soon as the membership reaches 100, the present membership fee will be doubled. As one of the first public bodies to advocate Arbor Day the board will be represented by a committee at the tree-planting flesta.

Secretary Burdette reported that he had visited nearby towns in Los Angeles county to learn the views of the real estate dealety on the subject of organization along the same lines as those governing the Reality Board, and he found the idea approved. As a result of suggestions made to him he submitted to the board amendments to the constitution and by-laws providing for the admission of reputable dealers throughout Los Angeles county to the privileges of the board. These amendments will be voted upon at the next meeting, and, if adopted, an active campaign for the enlistment of county members will be undertaken.

INDORSED TOO MUCH.

Other Men's Debts.

Other Men's Debts.

Here's a street-car conductor up against hard luck. O. J. Blanchard of Sherman yesterday filed in the United States District Court a petition in bankruptcy in which he says his entire belongings consist of household goods to the amount of \$50 and clothing to the amount of \$55.

His debts are a peculiar lot, for a man who owns nothing. On going surety for J. W. McKinney he claims he is made responsible for \$84.32; on surety for M. J. Munday, \$30; on surety for E. E. Brown, \$30; borrowed money for himself, \$16; dental work for self, \$34.00; medical attendance for self, \$37; total, \$211.70.

He also claims that he has done but four days' work in the past month, earning but \$9. It looks as if it would be a good time for those fellows to come to his rescue upon whose notes he became surety, even if he does escape payment by going through the bankruptcy court. He probably concluded that while he was having his sensitive feelings hurt on account of the protested notes, he might as well include the dentist and the doctor.

BUTTGENBACH MURDER CASE.

(BY THE ASSOCIATED PRESS—P.M.)

SAN FRANCISCO, March 10.—The
Coroner's inquest into the case of Joseph Buttgenbach, the wealthy butcher
who was shot to death, ended today.

The jury found that the deceased was
killed by unknown parties and added
that there was not the slightest evidence to connect Alfred Buttgenbach,
son of the deceased, and Louis Brune,
his bookkeeper, with the crime. The
police later released from custody
young Buttgenbach and Brune, who
had been detained under picton.

The detectives admit that they are
without the slightest clue to the murderers.

Commissioner Dow of New York Warns Senate Committee of Loss of Water.

(BY DIRECT WIRE TO THE TIMES!) ALBANY (N. Y.) March 10.-[Exclusive Dispatch.] If the further proposed encroachments upon the water of Niagara River for developing power be allowed, American Falls may not only be diminished, but absolutely dried up.

No other enterprises were discussed and no conclusion was reached.

"These gentlemen," said the Secretary, "have been here at my invitation to talk over the conditions which may attract capital to the Philippines. We want to get capital to go over there and help develop the Isalnds."

About what was the disposition of the capitalists, he was asked.

"Well, I must say they are not biting quite as hard as we would like. Still, some of them have displayed interest."

He admitted that the purpose of the conference was to get information for use in framing laws regarding franchizes, which would give the Philippine Commission further powers looking to the proper development of the islands.

"This information we have been getting today is to be used in drafting the bills that may be put before Congress," he said.

the bills that may be put before Congress," he said.

He said there was no desire to make the concessions too liberal.

"While today's conference was limited to the subject of railroads," said the Secretary, "it is not the intention to limit development in the Philippines to these industries. It was at first the intention to confer on steamship routes and lines, too, but it was decided not to do this today."

Mr. Taft, who left for Washington tonight, said he would make a report on the subject to a Congressional committee, Saturday next.

MORMONS
IN CONTROL.

The Control of the investigation of the Reed Smoot case before the Committee on Privileges and Elections was brought today in the testimony of E. B. Critchlow, formerly an assistant United States Attorney in Utah, who told the story of the Moses Thatcher episade. According to his version, which was borne out by official records. Apostic Thatcher porsisted in continuing as a candidate for the United States Senate against the United States of a quorum of the apostles, and on that account was held to be not in harmony with his "quorum."

The history of the campaign Thatcher made against the wishes of a quorum of the apostles, and on that account was held to be wishes of a quorum of the apostles, and on the Thatcher's Submission to the will of the church was read and put in the record of his subsequent trial before a committee of church officials and put in the record of his was given in detail. And then 'Thatcher's 'quorum' must be obtained in order that he may continue in good standing. The purpose of the testimony was to show that it was necessary, according to the rules of the church, for Reed Smoot to have obtained the consent of the church before he could have become a camdidate for the Senate. In addition to the Thatcher episode. Critchlow gave the history of the prosecutions in Utah on charges of polygamous cohabitation, since the bishop of his ward, and that other officials do not interfere. He said he had never known of a practicing polygamous cohabitation, since the bishop of his ward, and that oth amist who continued to cohabit with the plural wives he had married prior to the manifesto in 1890. He covered the passage of all acts affecting polygamy or Mormonism, including the representations made to the Congressional committees which visited the Territory prior to the admission of Utah as a State. The purpose of his statement was to show that the Mormons continued to create the sentiment that the laws were being obeyed, but in secret had practiced polygamy, and that the church was open to no new conditions and that its members were conspiring to evade the law. Critchlow was interrupted very little, and told his story concisely. He said that in the first State Legislature in 1896, when he sat as a member, there was a disposition to each all legislation to the Mormon church, to see if it were proper to enact it.

Of the Moses Thatcher incident, Critchlow said a letter had been sent out which had the purpose of dividing the people as equally as possible between Republicans and Democrata, so as to maintain a reserve which could be swung either way in the interest of the church. The church afterwards denied this letter, said Critchlow, but Moses Thatcher continued working in the interest of the Democratic party, and in the sutumn of 1896, carried on an active campaign for election to the United States Benate by the succeeding Legislature. The popular sympathy was with Thatcher, because it was understood that he stood for absolute liberty in political affairs. Thatcher continued in the field up to the final result of the contest, which ended in the election of Joseph L. Rawlins as Senator. He said it was well known that the apostles were working against Thatcher, their object being to prevent a direct blow at the principle that a quorum of apostles could control the action of one of their members. The Mormons, he said, were responsible Mormons, he said, were responsible for the election of Rawlins. "Thatcher's effort to secure the

The first amendment provides that in carrying out any irrigation project under the Reclamation Act, the Secretary of the Interior is authorized to divert the Colorado River, and reclaim, utilize and dispose of lands in the Yuma and Colorado Reservations, reserving and ale loting five acres of irrigable land to each Indian and selling the remainder to settlers, under the provisions of the Reclamation Act. In addition to charges to settlers, under the provisions of the system, such sums are to be charged as represent the value of the lands before irrigation, to be set apart for the benefit of the Indians.

An amendment relating to Pyramid Lake Reservation provides that each Indian shall receive ten acres of irrigable land. A provision in the Indian bill of practically the same effect was ruled out in the House last Saturday on a point of order raised by Representative Livernash, who described it as "new legislation of a dangerous type."

GOLD FOR JAPAN.

PAYS FOR WAR SUPPLIES. [BY DIRECT WIRE TO THE TIMES.] WASHINGTON, March 10.—(Exclusive Dispatch.) The Director of the Mint has received notice from the Superintendent of the Mint in San Francisco of the expected receipt at that point, during the latter part of the present week, of 6,000,000 yen from Japan. This will call for a balance of Japan. This will call for a balance of \$3,000,000 to meet it, and the superintendent requests the transfer to this mint of enough to make up that amount in connection with the bullion fund he already holds. All this involves chiefly an exchange of telegrams between the treasury at Washington and the sub-treasuries at San Francisco and New York, so that parties placing 5000,000 ven in the subparties placing \$,000,000 yen in the mint at San Francisco may receive exchange on New York at once in payment therefor.

The present deposit, like others which have preceded it this year, is supposed to be in settlement of debts contracted in this country for supplies laid in by Japan in anticipation of war with Russia. There was evidently not enough American exchange to be had in Japan, and the bodily transfer of gold Japan, and the bodily transfer of gold has been made necessary to balance accounts. [BY THE ASSOCIATED PRESS-P.M.]

WASHINGTON, March 10.—Two contested nominations were called up today in executive sessions of the Sen-ate, but on account of the absence of

Senators interested, neither was acted upon. The nominations were those of Gen. Leonard Wood to be major-general of the army, which was passed on account of the absence of Senator Scott, and H. Smith Woolley to be assayer at Boise, Idaho, which was passed because of the absence of Senator Dubois.

The case of Woolley was called up by Senator Heyburn, who made the statement that his colleague, Senator Dubois, had said he would not oppose confirmation. Senators Teller and Carmack made objection to consideration on the ground that the latter's resolutions calling for representations from the Treasury Department concerning the Woolley nomination had not been acted upon. Senator Latimer insisted that the nomination could not be passed until Senator Dubois could be present.

The Aurora, which enjoys the reputation of being one of the fastest vessels, attempted to overhaul the two cruisers, which, however, put on more steam and ran away from her with the greatest ease. From the firing done by the Aurora, it was evident that she meant business.

Capt. Hill had a long conversation with the Japanese admirals when in Japan, shortly before leaving, and they told him that the main objective of the Japanese operations at present

confident of their ability to do so. No effort, the Japanese minister assured Capt. Hill, would be spared to reduce Port Arthur as quickly as possible. It would then be refortified by the Japanese, who would remain there, instead of following the Russians into the wilds of Northern Manchuria or Siberia. The intention also is to reduce Viadivostok as soon as the ice goes out.

In reply to the question as to whether the superior gunnery of the Japs was not due to the experience of the Spanish-American gunners, Capt. Hill said most emphatically that not a white man is employed on any Jap-anese warship in any capacity what-

Regarding the foreign correspo ents in Japan, Capt. Hill said that the feeling among them was intense. They were in despair at the reticence of the government and people, and found it impossible to gain even a scrap of authentic news. So far as Capt. Hill was thentic news. So far as Capt. The St. Petersburg government does not in any way doubt the sincerity of

the Chinese government in regard to neutrality, but it does seriously doubt

the power of the Chinese generals to keep their troops in hand.

Signs are not wanting that the Germans are not at all unanimous in sup-

port of Russia. Thus the Cologne Volks Zeitung, in an article on Ger-

SALT LAKE (Utah) March 10.—Jap-SALT LAKE (Utah) March 10.—Japanese in Utah have been asked to contribute \$10,000 toward the Japanese war fund being collected in this country by the Fokugikai (Patriotic Society,) a branch of which is being organized here. According to E. D. Hashimoto, the organizer, similar assessments have been made on the Japanese of Nevada, Wyoming, Montana and Colorado. Letters, it is stated, have been written to leading Japanese of every big city in the country, and every State will have an organization of the Fokugikai to collect funds for the home country in its struggle with Russia. Hashimoto says that \$250,000 has already been raised in San Francisco alone, and that large sums are coming from Oregon, Washington and British Columbia.

LORD ROSEBERY ANGRY.

He Attacks Premier Balfour for Us-ing the Word "Calumny" and Moves to Adjourn.

IBY THE ASSOCIATED PRESS-P.M.) LONDON, March 16.—[By Atlantic Cable.] An extraordinary scene disturbed the customary decorum of the House of Lords this evening. In a returbed the customary decorum of the House of Lords this evening. In a recent debate in the House of Commons. Premier Balfour had used the word "calumny" with reference to some statement made by Lord Rosebery in the fiscal controversy. When the House of Lords met today, Lord Rosebery asked Lord Lansdowne, the 'Foreign Secretary, what justification existed for the Premier's use of such a word. Lord Lansdowne proceeded to explain the circumstances which concerned the alleged presentation of two documents by Premier Balfour to the Cabinet on the fiscal question and the subsequent withdrawal of them. He admitted that the Premier had used the word in the heat of debate. He said he thought the circumstances justified some warmin on the part of the Premier, but that he had, consulted with Mr. Balfour, who told him that he did not desire to impute to Lord Rosebery a deliberate attempt to misrepresent him.

After Lord Lansdowne had finished, Lord Rosebery again arose and declaring the explanation had not been satisfactory, he fiercely attacked the Premier, whom he accused of being too "thin-skinned," adding." "People who live in glass houses should not throw stones." It is all-very well to defend such language by saying it was to the 'heat of debate' and only 'pretty Fanny's way. If a man cannot curb his tongue better than that, he is unfit to be the First Lord of the Treasury. "I do not personally care a farthing." I do not personally care a farthing.

service, and to furnish their horses and equipment, uniforms, etc. There are, according to the official statistics published in 1806 by the imperial commission. 150 regiments of mounted Cossacks, 2 divisions, 53 setnias or squadrons, 18 battalions of infantry, and 48 batteries of light artillery; in all 194,090 soldiers and non-commissioned officers.

The mobilization of the Cossack forces is rapidly made, without great expense of ink and paper. The mill-tury posts in the immense steppes, not being connected by telegraph lines, are served by 'gonzy,' or couriers, having the best of horses, and who stay permaneatly near the province governors in order to carry their of-ders to the log dwellings of the Cossacks. When the mobilization order reaches the central military administration of the provinces each goners starts, carrying in his right hand a small red flag in daytime, and a red lantern at night, crying. The Casralls you! Mobilization! In a moment all the village is up. On the high pole in front of the miunicipal building a red flag in daytime or a red lantern at night, crying. The Casralls you! Mobilization! In a moment all the village is up. On the high pole in front of the miunicipal building a red flag in daytime or a red lantern at night is hoisted. All the men are clothed in their finest caftans, of all colors. Nobody is missing; even such returns to the village; their mothers, wives or sisters would gonge out their eyes, as has happened several times.

The whole Russian Asiatic region from the Ural Mountains to Vladivostok is colonized by these Cossacks, to whom could be joined the thousands of converted Mongols living along taken and the force of Mongols living along the word the East. BRIEF NEWS NOTES.

At the last meeting of the Schubert Club, held at the home of Miss Helen Power, a good programme of music was rendered. Besides, there was an interesting paper on the life of Carl Tausis, read by George Guggenheim. This brought forth a number of questions and answers from the entire company.

Two highway robbers were brought over from Oxnard yesterday by Constable Eason and lodged in Jail. They are Juan Salmeron-and Valentine Drecho. The crime with which the two men are charged was that of robbing Andy McDonaid, an aged horseman. They waylaid McDonaid in daylight, knocked him down and rifled his pockets of the small amount of money he had.

HILONA SHOCKS 'EM.

Hilona shocked some of the sports considerably by winning the baby race in a hard drive, beating the favorite, Sinicado, a head. The good thing, Herthus, ran a good race from a bad start. This was not the only surprise, for both Metlakatia and Durbar scored at 6 to 1, and in the last race, the even-money favorite. Messo, ran last in a field of five, McGrathiana Prince winning in a walk at 5 to 2. Evermore took the opening puppy race at 4 to 1 and Foncasta got out of the maiden class by luckily winning the six-furiong dash for maidens. The card was only an ordinary one.

Ex-Postal Official Charged With Robbery-Concession for Liquor and Meat Trade at Cananca Brings Fortune-Repentant Thief Hangs Stolen Watch on Church Door.

CHARGED WITH ROBERY.

J. M. Pickari, late assistant postmaster at Douglas, has been held to
the Federal grand fury on a charge of
postoffice robbery. He is \$600 short in
the money order Yunds. Postmaster
Cadwell is doubly unfortunate, for he
must make up the shortage, having
omitted the usbal resulrements of a
bond from his assistant postmaster.
The town has grown with such rapidity
that the postmaster is compelled to
pay out in clerk hire about \$1000 per
annum more than the total emoluments of the office.

The first case of criminal libel, by
word of mouth, ever known in Arisona
has materialized at Bisbee, where Pete
O'Brien is charged by Thomas Scanhon with the utterance of language libelous and defamatory. O'Brien had
given Scanlan as sum of money for,
safe keeping. O'Brien claims that the
umount was \$535. Scanlan returned
him only \$120, which he imists was all
that he received. From O'Brien's remarks in the premises came the ground
for the suit.

A few days ago the home of C. H. Vall at Bisbee was robbed of jewelry and \$25 in cash, the latter the property of a missionary society of the Methodist Church. Remorse has touched the thief. He kept the money but has returned a watef, hanging it at night on the knob of the Methodist Church door. A Douglas report states that "a real estate man from Los Angeles named Stevens" is lost in Bonora. He started out on a hunting trip of a faw days and is very much overdue.

S. Beedy, aged 12, son of M. V. Beedy, of Tucson, ran away from home a few days ago. Beating his way on the freight trains, he fell beneath the wheels near Maricopa and was so mangled that death ensued within a few hours.

several months ago Yardmaster Wolff of the Southwestern railway yards at Bisbee, was accidentally struck on the hip by a baseball bat, while witnessing a ball game. A tumor formed where he had been struck the injury necessitating amputation of his leg at the hip a few days ago.

Doc Smith on Hand Again at the Third Station.

J. Piuvius, Esq., rode into Chutes Park on the wings of the east wind shortly after 2:30 o'clock yesterday afternoon and couched his demands to umpire the game in such persuasively liquid terms that J. Francisquito Mor-iey and Frank Selee, who had volun-teered to judge the play petween the regulars and Yanigans of the Chicago team, beat a hasty, precipitate retreat.

regulars and Yanigans of the Chicago team, beat a hasty, precipitate retreat. There was no argument possible in the face of such convincing eloquence as the rain god dumped forth yesterday afternoon, and after an inning had been played, a hot race ensued for cover. All but one got out of sight.

Those of the fans who have declared from Tub Casey's short legs and his well-khown reputation for being "there" when needed, that he is a duck are more firmly convinced of it now than ever, for what did Casey do but cavort around the lot like a colt long after the rest had surrendered to the rain! Around the outfield fence he waddled in the interminable graft of peeling off weight, and when the fans had all wended their way, Casey was still there.

CANANEA CONCESSION SOLD.

It is reported that Frank Proctor has sold for \$200,000 his exclusive concession, covering the liquor and meat trade of Cananea Mountains. Proctor is the father-in-law of W. C. Greene. For five years he has held the exclusive right to the sale of these commodities in Cananea camps, and is understood to have made more than \$250,000, beyond the value of the plant and business which he is now selling. Proctor has invested very heavily in cattle and proposes to return to ranching in preference to his present lucrative but distasteful occupation.

The gambling concession at Cananea is another monopoly. It is owned by Pedro Alvin, a relative of ex-Gov. Lorenzo Torres of Sonora. He is said to conduct fifty games of chance within the camp. A large number of residents at Cananea have petitioned for the abolition of gambling, but their petition has been disregarded by the Governor of Sonora and has been returned from the City of Mexico with information that nothing can be done without the Governor's assent.

MAWKISH SYMPATHY FOR JAPAN [A. Oullahan in March Buzz:] There is a good deal of mawkish sympathy in this country for the Japa in their fight against the Russians. This sentiment is nursed and petied by the newspapers and reflected by the gabbling of men who talk, and think not.

think not.

[Abraham Lincoln is here quoted.]
So spoke Lincoln, the statesman, whose memory we revere and whose counsel we respect and guard. Standing in the shades and observing our sentiment towards Russia today, the martyred Lincoln must grieve for his country's base ingratitude. For, while we are not called upon to violate our neutrality and independent position, we should at least show a friendly spirit towards a nation that was friendly to us in our hour of national peril. Let us recover ourselves and take the right stand. Speak but kind words for our white brother who believes he is fighting for the prestige and solidarity of the race. Call a plague upon the Japa and cheer the Slavs to victory.

The parade will include civic societies, lodges and citizens and school
children. At Central Park Mayor Snyder and others will speak, and the
school children will sing. Cars will
then take the assemblage to the, Fremont Gate in Elysian Park, where
they will be met by busses and tallyhos, and taken to the plot of ground
near "Cape Horn." Abbot Kinney will
superintend the tree planting, which
will be carried out according to plans
of the Park Commissioners.

Various lodges, societies and institutions will plant trees, and stakes
with the names of the planters will
be set with each.

The Arbor Committee has provided
for trees, shrubs and vines for the
children to plant in the various schoolyards, and these will be at the Chamber of Commerce after 1 o'clock Wednesday, so the children may take
them for next morning.

It is hoped to make this observation
of Arbor Day the most general of any
ever attempted, and the present rain
will greatly facilitate the work planned for the various public grounds.
